Safety Perspectives on Insurance Purchasing
Learn about benchmarking measurements and other best practices to arm your company’s decisionmaker with data to minimize rate increases in an out-of-control market, with a focus on the role safety plays in an insurance renewal.

Mehdi Arradizadeh, Vice President of Safety & Risk Management
Anderson Trucking Service, Inc.

Todd Reiser, Vice President, Transportation
Lockton Companies

Safety Craves Culture Change
The TCA Safety & Security Meeting presents you with valuable takeaways to drive innovative growth at your companies. Two frequent attendees share what they’ve changed within their company’s safety culture as a result of what they’ve learned, and how those changes have skyrocketed them to success.

Lucas Mowery, Safety Director
Grand Island Express

Michael Lasko, Safety Manager
Boyle Transportation

How to Manage an Aging Workforce
Learn coaching and wellness program ideas, ways to deal with awkward conversations, and tips for younger safety directors on dealing with generational differences.

Kim Beck, Vice President
Cottingham & Butler
What to Expect at Roadside
With technological advances come new threats to the safety officer and evolving ways to conduct a roadside inspection. CVSA discusses the enforcement of the future.

KerriWirachowsky, Director of Roadside Inspection Program
Commercial Vehicle Safety Alliance (CVSA)

Proliferating Marijuana Problems
Attendees will learn about the differing laws across the country, future of marijuana legalization, sale of CBD oil at truck stops, transporting CBD and hemp, and pertinent hiring issues.

Darrin Grondel, Director
Washington Traffic Safety Commission

Changes to C-TPAT
With the new updates to C-TPAT, cross-border carriers need to stay up-to-date on evolving requirements. This workshop will answer all of your certification questions and explain how hiring decisions can play into the cross-border process.

Steve Pedro, SCS Advisor
Supply Chain Security International, Inc.
CEO Panel

Hear from a group of industry-leading CEOs as they discuss the current economic environment and its impact on the trucking industry. In particular, they will discuss the relationship between the economy and safety, how the current driver market relates to safety, and other C-suite views on pressing safety topics.

Denis Dellinger
President & CEO
Cargo Transporters, Inc.

Dan Doran
President
Doran Logistics Services LLC

FMCSA Fireside Chat

FMCSA and TCA’s David Heller sit down to discuss how the Administration is prioritizing safety in its work, particularly updates to the Drug and Alcohol Clearinghouse and hours of service regulations.

David Heller
Vice President of Government Affairs
Truckload Carriers Association

TBD FMCSA Representative

Dave Nemo
Host
Road Dog Trucking
Truckload’s Data Security Existential Threat

With an increasingly connected industry comes an exponential growth in the potential for malicious actors to take control of our devices – even our trucks. Cybersecurity expert and engineering professor Jeremy Daily will expose these security flaws and provide best practices for your safety team.

Jeremy Daily, Ph.D. P.E.
Associate Professor, Systems Engineering Department
Specialization: Heavy Vehicle Systems – Cybersecurity & Forensics
Colorado State University

The Safety Truck of the Future

In 3-5 years, how will advanced safety technologies proliferate the trucks rolling off production lines? What are the safety investments carriers will be expected to make, and do these new technologies justify the cost? Hear from Kary Schaefer of Daimler Trucks North America on what she sees as the safety improvements for 2020 and beyond.

Kary Schaefer
General Manager of Freightliner/Detroit Product Marketing & Strategy
Freightliner

Nuclear Verdicts: What Helps and What Hurts?

War stories of nuclear verdicts are virtually inescapable in today’s overly-litigious environment. Legal experts and truckload carriers involved in these egregious cases share insights on their experiences. Learn about which safety technologies can help or hurt you and how safety’s role in the hiring process is examined through a legal lens.
